University of California, Davis • B.S Computer Science • December 2018

skillset

Development HTML/CSS/JS, C/C++, Python, Java, Node.js, React

Design Illustrator, Photoshop, Sketch • Typography, UI, UX

projects activities

Best First Response App

Received an award at UndocuHacks for a responsive web application that connects low-income immigrant communities to first responders and legal assistance based off a crowdsourced map. 1 of 2 programmers who built the back-end and front-end using the MEAN stack.

Startup Hub Chair

Design and Technology Chair for Startup Hub, whose goal is to kickstart student led start-ups. I developed and led workshops on web development, design and user experience and web analytics.

Hack CC Organizer

Worked with a team of 5 to organize the world's first community college hackathon in Santa Monica. I played crucial roles in contacting sponsors, creating a marketing and sponsorship packet, and creating the website.

experience

Freelance Front-end + Design

2016 - Current

I've worked with several non-profits, artist and small companies by launching their websites, designing logos and marketing materials. My freelance has a networking and leadership component as well as a prototyping and front-end development component.

Santa Monica College Computer Science Tutor

9/14 - 5/15

Helped students with syntax, object oriented programming, and data structures in C++, Java, Python, C, Assembly and HTML/CSS.
