**HTTPS Everywhere:**

enables sites HTTPS protection which can protect you against eavesdropping and tampering with the contents of the site or with the information you send to the site, depends entirely on the security features of the individual web sites that you use; it activates those security features, but it can't create them if they don't already exist

**DuckDuckGo:** The search engine that doesn't track you.

<https://duckduckgo.com/>

**uBlock:** Blocks Ads and Trackers

<https://www.ublock.org/>

**Privacy Badger:** Privacy Badger blocks spying ads and invisible trackers

<https://www.eff.org/privacybadger>

**Purify:** Ad + Tracker blocker for iOS

<https://www.purify-app.com/>

**WARP Browser:** Safe Internet browser for Android

<https://play.google.com/store/apps/details?id=com.em.warp.browser&hl=en>

**Google Analytics Opt-out Browser Add-on:** prevent you data from being used by Google Analytics

<https://tools.google.com/dlpage/gaoptout>

**VPN:** Encrypts your connection and provides you with an anonymous IP. Browse anonymously and defend yourself from data monitoring and eavesdropping.

**Recommended VPN Service:** <https://www.privateinternetaccess.com/>

**TOR:** Tor aims to conceal its users' identities and their online activity from surveillance and traffic analysis by separating identification and routing. It is an implementation of onion routing, which encrypts and then randomly bounces communications through a network of relays run by volunteers around the globe.
