skillset

Development	HTML5/CSS3, JS, C++, Python, C, Java
Design	Photoshop, Sketch, Illustrator - Typography, UI/UX
Other	Startup-Hub Chair <ul style="list-style-type: none">Led intro to web dev & web analytics workshops. Hack CC <ul style="list-style-type: none">Organizer for the 1st Community College Hackathon.

experience

Vida App	Founder + Developer + Designer	3/17 - Current
Vida is a mental health web application built with the MERN stack that helps patients journal their mental health while providing graph insights to patients and clinics. Funded by the CITRIS program at UC Davis. Expected completion and launch at Clinica Tepati in Sacramento will be in September.		
HerShe Clothing	Web Developer + Designer	6/15 - 01/16
I designed and developed the front-end and fully customized Shopify's back-end with custom Shopify API functions for analytics. Wrote python scripts to improve profit management. Wrote a marketing plan to launch their business from no online presence to a growing online retail company.		
Santa Monica College	Computer Science Tutor	9/14 - 5/15
Helped students with syntax, object oriented programming, and data structures in C++, Java, Python, C, Assembly and HTML/CSS.
